

NEW ZEALAND POLICE - SYNTHETIC DISCLOSURE TRANSCRIPTION

Issued: 23 September 2026. Reference: INVALID-NZPOL-CJB.

Requested by: Callum James Hartigan, formerly Callum James Byrne.

Search name: Callum James Byrne.

Date of birth: 17 August 1994. Birthplace: Christchurch.

Purpose: overseas child-related screening assessment, candidate-authorised.

Current residence supplied: 14 Wirrina Court, Gray NT 0830.

Current name linked by: registered NT name-change copy.

YOUTH HISTORY ENTRY

Year: 2011. Age at event: sixteen.

Jurisdiction: Christchurch Youth Court.

Conduct description: shoplifting of low-value retail goods.

Outcome: diversion completed; no conviction recorded.

Completion notation: required restorative tasks and return of goods completed.

Conviction category: nil conviction from this matter.

Further NZ entries: none returned in this synthetic search.

The 2011 New Zealand shoplifting matter was dealt with by completed Youth Court diversion and produced no conviction.

This disclosure includes the youth outcome for the specified screening purpose. It is not an ordinary commercial character endorsement. The record describes neither violence nor a child victim. The applicant was the young person dealt with in that proceeding. No later New Zealand court result is supplied by this search.

Identity matching note: the youth record predates the candidate's migration to Australia and his registered surname change.

The Australian citizenship date is not a change to the historical name used by the Youth Court. The search result retains Byrne so that the reader can compare it with the passport and the name-change record.

Source-handling field: no real police database was queried in making this fixture. Case identifiers, contacts and signatures are invalid synthetic placeholders. The printed dates form part of the exercise chronology. The disclosure author is an invented records clerk and does not certify any actual person's criminal history. Candidate contact is callum.hartigan@example.invalid; issuing contact is nz.disclosure@example.invalid; telephone 08 7000 0xxx. Page retained with candidate authority and the historical entry described above.

DISCLOSURE SCOPE AND DELIVERY RECORD

Transmission: applicant-authorised PDF text export, transcribed for assessment.

Destination: NT Screening Authority, fictional case.

Request signed: 21 September 2026. Result issued: 23 September 2026.

Source name retained: Callum James Byrne.

Current-name attachment checked: Callum James Hartigan, registered 3 May 2019.

Search matching used the complete birth date and Christchurch birthplace. The former name was not replaced in the youth entry. The applicant's own account of the event is in his personal statement; that account is not incorporated into this records response. The disclosure records the diversion outcome, rather than describing it as an acquittal, an adult conviction or a current charge.

Result categories:

Youth matter in 2011 | shoplifting | completed diversion

Conviction from that youth matter | none | no conviction recorded

Later NZ court outcomes | none returned | dated search response

Australian court outcomes | outside this issuer's search | separate disclosure

Australian protective orders | outside this issuer's search | separate documents

Employment discipline | outside this issuer's search | personnel source

The search limitations matter when reading a combined case packet. A nil later New Zealand category does not undo an Australian conviction, and the Australian result is not evidence that the youth matter never occurred. A completed diversion is an outcome with its own historical facts. The exercise preserves those facts so that an assessor can consider the whole supplied history without inventing a second conviction.

Routine administrative notes: applicant copy sent on issue date; forwarding permission included in consent; hard-copy postal service not requested; no fee instrument reproduced; no identity photograph attached to this disclosure; copies of identity items remain in the separately indexed bundle. Original source system fields have been replaced by visibly invalid reference values.

No character conclusion is supplied by the issuing clerk. The record cannot explain behaviour after departure from New Zealand or resolve a later domestic incident in the Northern Territory. Questions about those subjects belong with the sources holding those facts. This response completes the fictional NZ records request only. Prepared by synthetic disclosure clerk; signature field text-only; contact nz.disclosure@example.invalid.
