

TRAFFIC RECORD - SYNTHETIC DISCLOSURE

Issue date: 25 September 2026.

Candidate: Callum James Hartigan, date of birth 17 August 1994.

Licence identifier: INVALID-NT-LIC-CJH-XX.

Request purpose: candidate attachment to screening application.

Reference: INVALID-TRAFFIC-CJH.

INFRINGEMENT ENTRY

Event date: 9 May 2024.

Category: speeding, minor speed-band infringement.

Description: vehicle exceeded posted limit within the lowest infringement band used in this fictional record.

Outcome: infringement paid, finalised 28 May 2024.

Payment reference: INVALID-PAID-TRAFFIC-XX.

Court prosecution arising from entry: none recorded.

Licence suspension arising from entry: none recorded.

Vehicle registration: deliberately omitted; no usable number.

The traffic extract records one paid speeding infringement in 2024 and no other traffic entry.

No child, coaching session or transport of children is identified in this entry. The extract is supplied as ordinary history material.

The fine does not change the victim age or gravity of the separate 2016 assault. It is not printed as another assault conviction.

Licence status fields on issue date: current class C licence; expiry 5 December 2026; no suspension entry returned by this synthetic search. Address in licence record: 3 Ruse Street, Moulden NT 0830. A licensing address is not independently verified current residence by this traffic export. The application gives the present Gray residence and the identity copy retains the old address.

The traffic record does not contain a behaviour-risk assessment, blood-alcohol result, dangerous-driving conviction or traffic history from another country. Readers should not invent those facts from the mere existence of a speeding fine. No account balance is associated with this paid infringement in the export.

Source notice: no live traffic system was queried. Names, document identifiers and contacts are invalid fictional values. The exercise record cannot be used to renew a licence, contest a fine or obtain a real traffic result. Issuing contact: traffic.extract@example.invalid; telephone 08 7000 0xxx. Prepared by fictional records clerk for the candidate-authorised file.

NT traffic history - candidate-authorised extract | Ref SYN-24-CJH | Page 2 of 2
TRAFFIC EXTRACT - SCOPE AND COPY CONTROL
Candidate: Callum James Hartigan.
Former name checked for linkage: Callum James Byrne.
Issue date: 25 September 2026.
Source control identifier: INVALID-TRAFFIC-CJH-COPY.

Result-control table:
Infringements returned | one | 2024 speeding entry
Outstanding balance for entry | nil | paid and finalised
Traffic court prosecution returned | none | this supplied search
Suspension returned | none | dated status field
Current licence expiry | 5 December 2026 | same as identity transcription
Usable registration or payment token | none | removed from fixture

This copy-control page should be retained with the infringement page so that a reader can distinguish a paid infringement from a pending prosecution. The record uses a deliberately invalid licence reference. The date of issue is not the date the infringement occurred. The payment-finalised date remains 28 May 2024, separate from both the event and this copy transaction.

No conclusion about the candidate's suitability for child-related employment is entered. The proposed coaching role prohibits the candidate transporting children under its pending plan. This traffic export neither changes that plan nor establishes that the candidate has transported any child. The file includes the record because ordinary background documents often accompany a history response.

Address information is reproduced as held with the licence. The issuer has not corrected it from the application or bank statements. A document may be current while an administrative address is old. Such a difference is available for the assessor to identify without treating the licence as expired. The licence photograph, name and birth date appear on the separate identity transcription.

Routine delivery: electronic copy to candidate; candidate authorised forwarding to screening; no real account login, secure barcode or official signature image included. All private identities are fictional and all contact fields use invalid placeholders. The extract does not certify Australian citizenship, foreign visa status, historical residences or completion of a behaviour program. Those subjects belong to separate source records. End of two-page synthetic traffic disclosure. Contact traffic.extract@example.invalid; 08 7000 0xxx.
